Education

University of Staffordshire — London, UK
BSc.(Hons) in Computer Science (First Class Honours)— APIIT Sri Lanka — *Oct. 2022 – Feb. 2026*

St. Anthony's College — Kandy, SL
G.C.E Advanced Level - Physical Science — *May 2019 – June 2022*

Experience

We Will Australia — Victoria, Australia
Technical Lead — Full-Time — *Sept. 2025 – Present*

- Led and coordinated a cross-functional teams of marketing and IT with the agile workflows to deliver and Develop user-centered solutions across **35+ software products for multiple Australian clients**
- Managed end-to-end requirement gathering by collaborating directly with clients, translating business needs into clear UX strategies, technical specifications, and actionable team tasks.
- Planned, assigned, and tracked tasks for design and development teams, ensuring timely delivery, accountability, and alignment with project milestones.
- Developed and maintained the company website, contributing as a full-stack developer by implementing responsive UIs, RESTful APIs, and secure authentication mechanisms.
- **Directed User Experience strategies** from ideation to delivery, creating design systems, wireframes, prototypes, and high-fidelity interfaces aligned with both user needs and business objectives.
- Actively contributed as a UX/UI Lead while executing hands-on design and development tasks, bridging the gap between design, engineering, and product execution.
- **Produced high-impact marketing creatives, UI components, and digital assets** to promote the company's digital products and service offerings.
- Collaborated closely with engineering maintain consistency in branding, accessibility standards, and overall user experience across all platforms.

Skill City Facility Solutions — Victoria, Australia
Digital Operations Manager and Branding — Part Time — *June. 2025 – Present*

- Formulated and executed digital operations and growth strategies to enhance brand positioning and scale client acquisition for Australian B2B markets.
- Spearheaded client outreach initiatives and relationship management, successfully onboarding new business accounts and streamlining corporate communications.
- Directed comprehensive marketing campaigns, brand identity development, and high-engagement social media strategies to drive inbound lead generation.
- Led the end-to-end development of 5+ corporate websites and an internal financial management system, optimizing cash flow tracking and resource allocation.
- Authored strategic business documentation, including corporate SOPs, high-level workflow guidelines, and operational reports to maximize process efficiency.
- Overseed digital infrastructure, financial invoicing, and business records management to maintain organizational compliance and seamless operational standards.

Xeynergy — Colombo, Sri Lanka
Intern UI/UIX Engineer — *Mar. 2025 – September. 2025*

- Developed the complete frontend of Xeynergy's latest HRM system using MERN Stack Framework, and Tailwind CSS ensuring seamless integration with backend components and Implementation of Shadcn UI.
- Designed Wireframes and high fidelity mockups based on user stories and client requirements, following thorough UX research to enhance usability and user satisfaction.
- Integrated MongoDB as the primary database, contributing to a scalable architecture for the Projects.
- Experienced in using ClickUp and Azure DevOps within an agile environment, maintaining constant team communication to have better workflows and enhance user satisfaction.
- Developed Static websites using Typescript following the agile hybrid methodology following Wireframes also designing over 3 variants per High Fidelity Mockup via Figma

Axiata Digital Labs Colombo, Sri Lanka

Product Marketing Intern *Oct 2024 – Jan 2025*

- Enhanced Axonect product website through bug fixes and UI/UX improvements targeting B2B clients
- Conducted market research on emerging trends in Telco and Digital industries
- Analyzed product performance data using Power BI and Excel to generate market insights

BITMO.IO Colombo, Sri Lanka

Graphics and UX Designer *Dec. 2023 – May, 2025*

- Analyzed data to optimize campaign reach and effectiveness.
- Delivered 40+ projects and artworks monthly for satisfied clients.

Projects

Great Aussie Caravans - MERN Stack | *MERN Stack, Stripe Integration* Dec. 2025 – Jan. 2026

- Official Project URL: greataussiecaravans.com.au

2024 – 2025 **Lunala: AI-Powered Retail Intelligence Platform** | *Flutter, Machine Learning, Blockchain*

- Designed and developed a full-stack retail management platform using **Next.js (App Router)** and a **Flutter mobile application**, following a **Service-Oriented and Hybrid Cloud Architecture**.
- Implemented a **Backend-for-Frontend (BFF)** layer with Next.js API Routes to handle authentication, request validation, data aggregation, and secure service orchestration.
- Built a dedicated **Python FastAPI AI/ML service** hosting pre-trained models (**XGBoost, LSTM**) for demand forecasting, discount recommendations, and product pairing intelligence.
- Integrated **OpenAI-powered conversational AI** to enable natural language inventory queries and decision support for retail staff and customers.
- Used **Firebase (Firestore, Authentication, Cloud Functions)** as a serverless backend for real-time data, role-based access control, and event-driven workflows.
- Implemented **biometric employee authentication** using ESP32 and optical fingerprint sensors, securely linking device validation with backend session management.
- Designed a **blockchain-based order verification system** using **Polygon smart contracts**, anchoring order hashes on-chain to ensure data integrity and tamper-proof records.
- Ensured security best practices including **RBAC**, server-side token validation, private key isolation, and environment-based secret management.

Outback Ops | *MERN* Nov. 2024 – Present

- Developed a comprehensive operations management dashboard using **Next.js** and **TypeScript**, featuring a scalable architecture with **Firebase** for backend services.
- Implemented **role-based access control (RBAC)** using Firebase Authentication to secure admin and user workflows.
- Built a real-time **staff clock-in system** with geolocation tracking via **Google Maps API** to monitor workforce attendance.
- Created dynamic **task management boards** with drag-and-drop functionality using **dnd-kit** for efficient resource allocation.
- Automated recruitment processes, including candidate CV management and lead tracking, streamlining HR operations.
- integrated **Cloudinary** for optimized media storage and **Resend** for automated email notifications.

Teaser Yaraville | *Next.js, TypeScript, Firebase* Nov. 2025 – Dec. 2025

- Developed a full-stack restaurant website using **Next.js 15** with TypeScript, implementing both frontend and backend functionality with Firebase for authentication and database management.
- Built a comprehensive **Admin Dashboard** for content management, enabling administrators to manage products, categories, menus, blogs, events, user accounts, promotional offers, and job postings efficiently.
- Designed and developed multiple feature-rich pages including Menu browsing with filtering, Blog system with markdown support, Events management, Careers and Recruitment pages, and user profile management with favorites functionality.
- Utilized **shadcn/ui** component library and Tailwind CSS to create a responsive, modern UI with gradient designs and animations, ensuring optimal user experience across all device sizes.

- Official Project URL: www.teaseryaraville.com.au

We Will Australia Website | *MERN, Figma for HiFi Mockups, Git, Firebase* September 2025 – October 2025

- Developed both the Frontend and Backend of the website using **Next.js (MERN Stack)** with the REST API integrations and authentication via Firebase instead of MongoDB.
- Collaborated with the Operations and Business teams to gather and refine business requirements and translate them into technical specifications.
- Used ShadCn for Versatile reusable components as per the Project Requirements.
- Designed and developed an Admin Dashboard for content management, enabling administrators to create and manage articles and blogs efficiently.
- Developed and designed the Careers and Recruitement pages to hire talent and collect client requirements for recruitment.
- Official Project URL: www.wewillaustralia.com.au

Xeynergy HRM System | *MERN, Figma for HiFi Mockups, Azure DevOps* March 2025 – July 2025

- Completely Developed the Frontend with Backend Integration using **Next.js and TypeScript for the Project XeyConnect.**
- Followed a Design Research with the Business Analyst for the Wireframes to complete the Business Requirements and the SRS and designed the Hi-Fi Mockups using Figma using Color Psychology and several UI/UX theories for the best Outcome
- Used ShadCn for Versatile reusable components as per the Project Requirements.
- Checking of SonarQube Issues with Defects fixing, Quality Check inlvolved User Accessbility Testing, A/B Testing and fixing of Defects.

Skill City Facility Solutions | *React, Tailwind CSS, Figma* March 2025 – July 2025

- **Individual project that started with requirement gathering phase, progressed to wireframes in Balsamiq, then Hi-Fi mockups via Figma, and developed static web application using React.js**
- Followed a Design Research with the Business Analyst for the Wireframes to complete the Business Requirements and the SRS and designed the Hi-Fi Mockups using Figma using Color Psychology and several UI/UX theories for the best Outcome
- Used ShadCn for Versatile reusable components as per the Project Requirements.
- Resolved Lint Issues and SonarQube for the Product Environment
- Official Project URL: skillcityfs.com.au

Electronic Medical Recording System | *Laravel Framework, MongoDB* July 2024 – Oct. 2024

- Developed a full-stack web application using Laravel Framework, Laravel Jetstream for authentication, **HTML/CSS, JavaScript, PHP, MySQL, and MongoDB**, integrated with a Kotlin-based mobile application via RESTful API.
- Implemented features enabling patients to register, log in, book appointments with their chosen doctors, view medical history records, and download one-time prescriptions uploaded by doctors.
- Hosted dynamically on Porkbun Server: caremedical.cyou/home.

E-Commerce Platform - Laravel | *Laravel Framework, Kotlin* Aug. 2024 – Nov. 2024

- Designed and developed an e-commerce platform with a web app using **Laravel Framework** and a mobile app using **Kotlin Jetpack Compose**, connected to **MongoDB** and **MySQL** via RESTful API.
- Built the web app integrating HTML, CSS, Tailwind CSS, JavaScript, and PHP. Ensured feature parity in the mobile app using Kotlin.
- Added **CRUD functionality** for user registration, login, order history, and payments via **Stripe** or cash on delivery.
- Created an **admin interface** to manage users, orders, and products (CRUD) and track monthly revenue.
- Implemented separate admin and user logins for secure access.
- Performed **automation testing** with **Selenium** and unit testing for reliability.

Personal UI/UX Portfolio | *Figma* March. 2025 – Present

- Official Project URL: Dribble

Technical Skills

Languages: Java, Python, Kotlin, PHP, JavaScript (Express.js, Node.js, React.js, Redux), HTML, CSS (Vanilla.css, Tailwind CSS), Mongoose, Next.js and TypeScript
Frameworks/Tech Stack: Laravel, MERN Stack
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, PyCharm, IntelliJ, Android Studio
Testing: Familiar with Automation Testing with Selenium, Unit Testing
